

The "flex-direction: row;" stacks the flex items horizontally (from left to right):

## The flex-direction Property

The "flex-direction: row;" stacks the flex items horizontally (from left to right):

```
.container{  
  /* 宣告flexbox */  
  display: flex;  
  /* 橫row(default) 直column */  
  flex-direction: column;  
  width: 100%;  
  height: 80vh;  
  background-color: lightblue;  
}
```
